Abstract (en)  
[origin: EP1174845A2] The self-adhesive label, with a protective laminate, has a field (2) to take writing and a transparent laminated cover (3). The labels are arranged next to each other on a plane in a writing configuration, with the covers. The protective laminate is embedded in adhesive on both sides, and has an outer protective covering layer at a gap from the writing field, and on a common carrier. The protective cover is fixed over the writing field after bending the carrier along a folding or perforated line (5a,5b), when the outer protection has been removed.
