Abstract (en)  
[origin: WO0064402A1] A dental casting alloy based on Ni and Ti and having addition of cast of Mo, Fe, Cu and Co has the following composition in weight %:Ti: 40 - 50 % Mo: 0.2 - 2.0 % Fe: 0.1 - 1.5 % Cu: 0.1 - 1.0 % Co: 0.1 - 0.5 % Ni balance to a total of 100 %; the alloy has advantages over prior alloys for dental castings including a high level of fluidity, a low shrinkage percentage, a low melting temperature and super elasticity.
