Abstract (en)

[origin: WO063311A1] A powder coating composition, which comprises (A) an advanced epoxy resin prepared by reacting a mixture comprising a bisphenol diglycidyl ether of bisphenol (A1) and an epoxy resin having an epoxy functionality of > 2(A2) with a bisphenol (A3) in the presence of an advancement catalyst, and (B) a polymer containing epoxy-reactive groups is distinguished by good flow behaviour and increased storage stability.
