Abstract (en)

[origin: EP1176110A2] The method for avoiding coiling damage to sheet material, in particular, paper and cardboard being coiled onto a coiling drum (2) consists of decoupling, as much as possible, at least the initial material layer from the drum surface. Also claimed is a coiling drum for implementation of the method. It comprises a coating (7) which covers end sections of the drum surface and is provided with at least one groove (8).
