Abstract (en)

[origin: EP1176271A2] The lock is operated by a closing cylinder (3). A counter-thrust piece (7), on the component (5) side mounted in the door (1), grips behind the thrust piece (8), on the closing cylinder housing (4) side,. Either the thrust piece or counter thrust piece is mounted so that it is movable out of the range of the other thrust or counter thrust piece, by means of a tool inserted from part of the door inaccessible from the outside of the door for releasing the lock.
