Abstract (en)

[origin: EP1176380A2] The connection has its flange (1) made by stamping or extrusion. Fixing holes are bored through the flange. Alternatively, there may be a stamped or extruded intermediate piece (3), or an edging extruded on the flange, for connecting to the cover plate or base plate (4) of the radiator. The intermediate piece, if any, may be soldered to the input or output channel of the radiator.
