Abstract (en)
[origin: WO0060979A1] A patch assembly (5) having pre-applied pressure sensitive adhesive for semi-permanent attachment to a live animal is described. This assembly permits the easy and clean attachment thereof to live animal. Further, the assembly prevents skin irritations while maintaining superior bond strength and, in turn, remaining intact and attached to the animal for extended periods of time. The invention may be used, for example, for device attachment to human and non-human animals.
