Abstract (en)

[origin: WO0069716A1] Bearing (1) for the propeller driving shaft (18) of a boat comprising at least one element of attachment (3, 4, 22) to the hull (2) and at least one bearing arm (5, 21) of the propeller driving shaft (18). The element of attachment (3, 4, 22) and the bearing arm (5, 21) are connectable together and mutually orientable and/or adjustable about at least one axis (B, C), and are mutually lockable in the final selected position.
