Abstract (en)  
[origin: WO0048915A1] The invention relates to a device for transporting and supporting bottles and similar, elongated objects, and comprising at least one first element (1, 1') supporting at least one bottle (5) and at least two gable elements (2, 3) connectable to the element (1, 1') supporting said bottle (5). The elements (1-3) in a dismountable condition have one bottle situated in said supporting element (1, 1') and giving the gable elements (2, 3) provided in front of and behind said element and the end of the bottle, are transport-secured by a transport package (7) tightly surrounding the elements (1-3) and the bottle (5) and said elements (1-3) constitute a bottle rack during a mounted condition having the gable elements (2, 3) vertically orientated and fastening means (12, 13; 19, 20) fixed to side flange parts (10, 11) bent mainly right angled in relation to the extending plane of the elements (1, 1').
