Abstract (en)
[origin: DE10009592A1] The invention relates to a pressure valve, especially a pressure regulator, of a fuel supply system. A contact terminal link (20) is joined in a fixed and durable manner to a housing part (4) of a pressure valve (2) with the aid of a joining material (24). A connector pin (20a) is formed on said contact terminal link (20). A cable that leads to an electrical ground can be easily connected to the connector pin (20a).
