Abstract (en)

[origin: FR2793300A1] The invention concerns accessories for motor vehicles. The inventive cover plate is designed for a motor vehicle alternator powered by the engine via a belt, capable of being adapted for different vehicle engines, comprising means for fixing an alternator, mechanical and electrical linking means between the alternator and the engine and means for tensioning the belt, and it includes at least a lower lug (2a, 2b) to be fixed to the vehicle engine and at least two adjustable upper lugs (3) for tensioning the belt. The invention is useful for replacing motor vehicle alternators.
