Abstract (en)  
[origin: EP1177752A2] The display for photographs, and the like, is a board (1) with a transparent adhesive holding layer (2). Film material components (10,10') fit the outer contour of the board, to be mounted at the edges to form a frame, held in place by the adhesive layer. Photographs (8) and the like can be arranged as required on the adhesive layer of the panel, to stay in place and be lifted clear easily for a change of presentation.
