Abstract (en)
[origin: EP1178159A2] The fastener, for use in construction and/or installation of fittings, has at least one longitudinal and especially rail-shaped coupling (12) as an acoustic insulation and support for a carrier to be fitted to the floor or a wall. The coupling has a sandwich structure with at least one hard support profile (16) against the floor/wall and at least one damper strip (18), with acoustic insulation layers (24,26), in contact with the support profile surface.
