Abstract (en)

[origin: EP1178284A2] To provide an adjusting method of an electronic azimuth meter capable of properly adjusting the electronic azimuth meter and an apparatus used for the method. According to an adjusting method of an electronic azimuth meter having a magnetic detector, magnetic fields including strong magnetic field for starting adjustment are generated at a magnetic field generating apparatus capable of generating the magnetic field stronger than the geomagnetism by an adjusting magnetic field generating sequence, the electronic azimuth meter for acquiring output data of magnetic sensors by adjusting a data acquisition sequence in correspondence with the magnetic field generating sequence, is arranged in a magnetic field region produced by the magnetic field generating apparatus by the magnetic field generating sequence and an adjusting data acquisition sequence of the electronic azimuth meter is started by step of sensing the strong magnetic field for starting adjustment by the magnetic detector. An electronic azimuth meter adjusting system is provided with the magnetic field generating apparatus for generating magnetic fields by the adjusting magnetic field generating sequence and the electronic azimuth meter for acquiring adjusting data by the adjusting data acquisition sequence. <IMAGE>
