Abstract (en)

[origin: WO0064771A1] The invention relates to a thermoformed container of thin-walled plastic, with a material thickness (t) of between 0.1 and 2.0 mm, comprising a container part (1), with a bottom section (2) and a wall section (4), and a closure part (3), the closure part (3) comprising threads (5) and an annular sealing face (7). The container is characterized in that the free end (13) of the collar (10) has the largest diametrical dimension of the container. The invention also relates to a method for the manufacture of said container.
