Abstract (en)  
[origin: WO0071501A1] The invention relates to polyalcoxyamines obtained from beta -substituted nitroxides of formula (1) wherein A represents a di-or polyvalent structure, RL represents a mole weight of more than 15 and is a monovalent radical, and n >= 2. The inventive compounds can be used as initiators for (co)polymerizations of at least one radically polymerizable monomer.
