Abstract (en)  
[origin: DE10010944A1] The accumulator has a tubular base body (1) welded to at least one sleeve (13) for connection to a high-pressure line (6). A collar (14) on the end of the sleeve (13) faces the base body. A bore (3) in the base body opens into an intake funnel (4), which expands to hold the end (5) of the high-pressure line. The high-pressure line is pressed against the intake funnel by a screw (10). The sealing point is surrounded by an insulating ring (18).  
[origin: DE10010944A1] The accumulator has a tubular base body (1) welded to at least one sleeve (13) for connection to a high-pressure line (6). A collar (14) on the end of the sleeve (13) faces the base body. A bore (3) in the base body opens into an intake funnel (4), which expands to hold the end (5) of the high-pressure line. The high-pressure line is pressed against the intake funnel by a screw (10). The sealing point is surrounded by an insulating ring (18).
