Abstract (en)
Appliance is described for hairstyling through heating and pressing of the hair, of the kind composed of a pair of interchangeable or fixed heated plates, mounted on a support which opens to allow the introduction of a lock of hair and closes to tighten the plates on said locks, wherein the shape of the plate surface, consists of several series of rows that cross each other - respectively raised (2;3) on one plate and sunken (2';3') on the other - to form a series of raisings on one plate to be inserted in the corresponding housings (4) on the other. <IMAGE>
