Abstract (en)

A mounting and display system for visual material, comprising a mounting card 11 for a photograph 17 or the like, and an envelope having a base 19 and a top sheet 20 having a window or aperture 23 therein. The mounting card 11 is of a transparent flexible material such that the photograph 17 can be mounted on the rear of the mounting card, the mounting card slotted into the envelope, and the envelope securely fixed, thereby producing a combination which can be posted. Preferably the system includes a flap 22 at the mouth of the envelope, preferably forming part of the top sheet, which can be tucked in or stuck down to hold the mounting sheet securely. The address will normally be written on the back of the envelope (like a postcard, in which the address is written on the opposite side from the picture). The envelope may be pre-printed with suitable postage, or any stamps required may be stuck onto it. <IMAGE>
