Abstract (en)
[origin: EP1179488A2] The bottom surface (23) of the base of the cage for holding a plastic container has a plane tapering away from the opposite lying rectangular side and which by its lower end changes into a recess (20) and then changes into two planes (27) rising again towards to the two adjacent corners. Between the tapering plane and two rising planes an edge (25) which may be rounded extends at an angle of preferably 20-40 degrees to the rectangular sides.
