Abstract (en)  
[origin: EP1179647A2] The adjustable working platform has roller assemblies (14) fitted on the base frame. Profiled rails (4) are fastened to the underside of the platform's floor plates (12,13) and comprise a horizontal member and downwards extending side walls with their lower ends angled inwards. The profiled rails each accommodate a pair of running rollers and are movable along them. The profiled rails on the working platform outer side furthest from the outer wall of the building project over the edge of the respective baseplate, and on the projecting section of the rail is fastened the support post (18) of a railing.
