Abstract (en)

[origin: EP1179653A2] The seal for a building door or window corner (10) with two angled frame members (11,12) has a seal (13,13') mounted between the members and attached to the upright (14) to extend horizontally. The seal engages the leaf via multiple sealing prongs (16) extending in parallel. The prongs can have different shapes to reduce air flow.
