Abstract (en)
[origin: WO0070174A1] A latch assembly (40) including a latch mechanism (42) for securing a door in a closed position, the latch mechanism including a latch release mechanism (44) for unlatching the latch mechanism, the latch assembly further including a cable arrangement (12) having a plurality of release cables (14, 16) each operably connected to the latch release mechanism, actuation of any of the release cables causing unlatching of the latch mechanism in which each release cable acts through a common position (60) on the latch release mechanism and those ends of each cable proximate the common position are connected to each other by a cable nipple (18).
