Abstract (en)  
[origin: DE10040761C1] The tamping device has a main tamping device (1a) and at least one sideways extensible tamping device (1b"), cooperating with a side limitation device (7) which is folded inwards for reducing the overall width during transport. The rear side of the extensible tamping device has a horizontal guide (17) transverse to the movement direction, for reception of a sliding and rotating guide rod (14) attached to the side limitation device.
