Abstract (en)  
[origin: WO0075272A1] The invention relates to non-aqueous liquid dishwashing compositions for dishwashers that are characterized by a high physical (deposition behavior) and chemical (decomposition of bleaching agent) stability and good cleaning properties without requiring high quantities of surfactants. The inventive dishwashing agents contain 20 to 50 wt.-% of one or more water-soluble builders, 1 to 25 wt.-% glycerol, 5 to 40 wt.-% of a polyethylene glycol that is liquid at room temperature and optionally up to 20 wt.-% 1,2-propanediol and  $\leq$  2 wt.-% free water in addition to other optional detergent ingredients.
