Abstract (en)
[origin: WO0073678A1] The invention relates to an internal combustion engine, wherein the crankshaft (1) is provided with a pulley or an inertia wheel (4) joined thereto by fixing means, wherein said inertia wheel (4) is provided with at least one pendular element (40) whose dimensions, mass and positioning on said inertia wheel (4) are determined in such a way that they can be tuned to the main harmonic pulse region of the acyclism.
