Abstract (en)

[origin: WO0072344A1] The invention relates to a bed control unit for use in the field of nursing care, comprising a housing (10) and control devices (18, 20, 22) for actuating functional units and mounted at least partially on a wall of said housing (10). In order to provide a functionally reliable and easy-to-clean bed control unit for use in the field of nursing care, the wall of the housing (10) has a continuous foil at least in certain sections of the outer side thereof and the housing (10) is waterproof.
