Abstract (en)

[origin: WO0160038A1] A telecommunication system configured for use with a telecommunication network (114) for delivering messages to users (Un, MUn). The network (114) includes switching junctions (Gn) and the communication channels for effecting various telecommunication milieux. Selected telecommunication service providing stations (210) serve user-operated communication devices (74, USERn) using selected telecommunication milieux of the various telecommunication milieux.
