Abstract (en)

[origin: EP1181919A2] The lifting device (1) comprises a lifting arm (30) which has a carrying unit (40) for a person with a travelling unit and two parallel rolling elements (10). The long rolling elements have joints enabling folding and are telescopic, and two connected supports (21,22) are removable from the rolling elements. The bearing support (23,24) has a lock bolt (23a,24a) for fixing to the traverse (41), and an A-shaped supporting element (20).
