Abstract (en)

[origin: EP1182141A2] Comb-like rails (15) have a solid area (2) and equi-spaced teeth (3) projecting from a narrow edge (13), enabling the rails to interlock at 90 degrees to each other and form compartments. The main faces (4) of each rail have a recess (6,7,8) leaving a raised peripheral edge (9) around the main surface and the teeth. The height of the edge lies in the plane of the main surface.
