Abstract (en)

[origin: EP1182145A2] The packing material comprises pieces of Kraft paper folded into a cup shape. The cups have a flat base (17) and walls (18) formed by creasing the paper in several directions so that their overall thickness is several times the actual thickness of the paper. Independent claims are included for: (a) a method for making the packing material; and (b) a machine for making it.
