Abstract (en)

[origin: EP1182163A1] Limiting device for elevators, that is, it is related with a device which does not permit a threshold speed to be surpassed, in such a manner that once surpassed it provokes the halting of the elevator by means of the actuation of a "safety" which causes it to become wedged. The speed limiter object of the invention can work in both the upward and downward directions and is mounted on the elevator car.
