Abstract (en)

[origin: EP1182294A2] The sleeper has a solid one-part body (1) with top support surfaces (7) for rails (9). The body has a central section (2), extending in longitudinal direction (l) of the track, with a part of a first height (h1) forming the rail support surfaces. A section (3) on either side of the central one has a second height (h2), lower by at least 1/4 than the central section. The transitional walls (4) between the sections enclose and angle of approx. 45 degrees .
