Abstract (en)

[origin: EP1182674A2] The device has an adjustment sliding element (16,17) for the relevant end position that works in conjunction with a latching device (39,40) that operates in the adjustment state and a fixing arrangement (21,11) controlled by a restoring arrangement (14,15,10) connected to an indexing plate axle so that it releases the latching element (40) and resets the latched adjustment sliding element (17).
