Abstract (en)
[origin: FR2793662A1] Envelope (1) includes front wall (3), rear wall (4), and is closed using flap (5). Opening of envelope can be sealed using two rigid parallel rods (6, 7) made of reinforced plastic or metal, so that walls are pressed against each other. This position is secured using foldable strips (8) attached to flap, and having apertures through which rods are inserted.
