Abstract (en)
[origin: DE19921902A1] Antimicrobial copolymer contains at least two different prim. amino functional monomers. Antimicrobial copolymer is prepared by polymerizing aliphatically unsaturated monomers (I) having a prim. amino group(s) with further aliphatically unsaturated monomers (II) having a prim. amino group(s). An Independent claim is included for the preparation of the above copolymer by copolymerizing monomers (I) and (II).
