Abstract (en)

[origin: US6821356B1] A cleaning apparatus includes (1) a pressure tank with at least one cleaning tank arranged therein; (2) means for supplying the cleaning apparatus with a cleaning fluid; and (3) means inside the pressure tank for setting the at least one cleaning tank in motion, wherein by these means the at least one cleaning tank is movably arranged relative to the pressure tank in terms of at least one of rotational or translational movement.
