Abstract (en)  
[origin: WO0179691A1] A system (100) for controlling a vehicle powertrain is disclosed. The system includes a powertrain circuit (102) for receiving a plurality of powertrain operating signals, processing the operating signals for controlling the vehicle powertrain, and an air-intake manifold (50) fixable to an engine of the vehicle powertrain and adapted to receive the powertrain control circuit. The present invention provides a self-contained vehicle powertrain that is testable before installation into a motor vehicle.
