Abstract (en)

[origin: EP1183972A1] Profile rail system (1) consists of a base profile (5) fixed to the floor using fixing pins or adhesive and a covering profile (6) interacting with the gap (4). The base profile and the covering profile each having a connecting element with contact surfaces (8) directed at an angle to the base covering. The contact surfaces of one of the connecting elements are surrounded by the contact surfaces of the other connecting element. The contact surfaces are linear and parallel to each other and have a bent contact region (12) suitable in diameter to the distance of the parallel contact surfaces.
