Abstract (en)

[origin: EP1184099A1] Machine for bending metallic bars, comprising at least one bending unit (9), comprising a structure (10) equipped with a foldaway extension table (20), formed by a rolling blind shaped and guided structure, presenting a variable length upper branch (20) forming said extension table, on the resting table level of the bending unit (9), and a lower branch (21), which is parallel and distanced from the upper branch.
