Abstract (en)

[origin: EP1184284A1] The present invention provides a method of packaging goods having a liquid element, said liquid element comprising dissolved gases, wherein the liquid element is treated prior to the goods being subjected to a vacuum packing process, such that a substantial volume of the dissolved gases do not escape from said liquid element during said vacuum packing process. Suitable methods of treatment of the liquid element include subjecting the liquid element to a gas removal process and subjecting the liquid element to a freezing process.
