Abstract (en)
A modular line applicator which can apply different line marking media to a surface depending upon the line marking module mounted to the applicator frame. The module line applicator includes a frame having a distal end and a proximal end. A handle is mounted proximate the frame proximal end for grasping by a user. A line marking module is detachably mounted to the frame distal end, and includes a support member having a proximal end detachably mounted to the frame distal end and a media applicator mechanism mounted to the support member. The media applicator mechanism applies the line marking media along a line on a surface. <IMAGE>
