Abstract (en)  
[origin: EP1184567A2] A rotor (10) is connected to a generator via a planetary transmission (6,5,2,16) and a spur gear stage (17,19). The rotor is located in the transmission housing (3,8,8'), and is connected to a ring gear carrier (7,7') with ring gear (6). The rotor is born in slide bearings (9,15), one of which is able to absorb axial forces. Rotor and carrier are an integral component. The teeth of the ring gear are surface-hardened.
