Abstract (en)

[origin: WO0076642A2] Apparatus, instrument, device and a method of mixing for conducting an assay. Apparatus (31) comprising a first and second inlet and an inlet port accommodating a filter and/or binder retaining means, the inlet port moveable relative to first and second inlets such that the port (9) can be brought into liquid communication with each inlet, and a sample chamber (3, 5) comprising a paddle (100) which undergoes a reciprocating motion.

[origin: WO0076642A2] Apparatus, instrument, device and a method of mixing for conducting an assay. Apparatus comprising a first and second inlet and an inlet port accommodating a filter and/or binder retaining means, the inlet port moveable relative to first and second inlets such that the port can be brought into liquid communication with each inlet, and a sample chamber comprising a paddle which undergoes a reciprocating motion.
