Abstract (en)
[origin: WO0073115A1] The invention relates to a vehicle combination consisting of a towing vehicle (1) and a semitrailer (2), which is equipped with an overrun brake system, wherein the towing vehicle and the semitrailer are coupled by means of a coupling device (3) having two coupling parts (4, 5) rotationally engaging with one another. One of said coupling parts (5) is supported on the towing vehicle while the other coupling part (4) is disposed on the lever arm (7) of a reversing lever (6) having two arms, which is supported on a chassis (9) of the semitrailer in such a way that it can pivot at a predetermined degree, wherein the overrun device (10) of the overrun brake system is mounted between the other lever arm (8) of the reversing lever and the semitrailer.
