Abstract (en)

[origin: WO0125558A1] The connector can transmit any forces from all sides by means of its physical design. Said connector can be easily assembled or as a result of the structure of the base plate (1) with add-on sections (2) a centre body (3) and a closure (4) with a groove (4a) and clamping screws (4b). The connector unit can be used wherever, a planned transmission of forces is required in all directions.
