Abstract (en)
[origin: WO0068916A1] An entertainment and/or training system providing a game-type system having two controllers, where the controllers have generally redundant controls. The controls can be limited on at least one of the controllers so as to provide one player with a simplified game to play. The person on the other controller then can act as a teacher, exclusively receiving some player input and exclusively providing some player output, so as to simplify the student's playing experience.
