Abstract (en)

[origin: WO0078016A1] A method for optical representation of information which is made available by an additional service and transmitted via an air interface to a mobile radio terminal (210) or an additional device (130) of one such terminal, whereby a mixed graphics/text representation occurs. Graphics and/or graphic elements stored in the mobile radio terminal (210) and/or additional device (130) are used for said representation. Said graphs and/or graphic elements are retrieved by means of address and position data which is transmitted with text information and are positioned on an optical display unit (131, 211).
