Abstract (en)
[origin: EP1186540A1] The packaging case is made from a pre-cut blank (30) and erected by folding. The rectangular median panel (45) is connected to the connecting strip (42) by an articulation strip (44) which is folded back against the connecting strip. The connecting strip and the back panel (49) are in the same direction in relation to the median panel and located in the same wedge compartment in order to reinforce one of the two triangular faces of this wedge compartment.
