Abstract (en)
[origin: EP1186726A2] Sheetting with a plastically shapeable grid (4') and at least one plastically deformable cover layer (2'), further incorporates a thin layer of crinkled fleece or foam material (3') glued or thermally joined to the grid. The purpose of such a layer is to fasten the cover layer to the grid. An Independent claim is also included for a roof ridge ventilating element made of the proposed sheetting.
